***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I, claim(s) 1-4, drawn to a generator shield, classified in 415/29

Group II, claim(s) 5-9, drawn to a generator with rotor and stator and axial flow fan.

Classified in 310/62,63

Group III, claims 10 and 11 drawn to method of cooling armature providing a nozzles

Classified in 310/58,59.

1. Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a generator gas shield with a annular ring having flange and carved inlet requires a search in class 415/29.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Inventions II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a genarator can be cooled with a

fan than using a nozzles. The subcombination has separate utility such as and also nozzles can be uses to bow air to any device like computer.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to applicant' representative Mr. Michael J. Keenam on February 20, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
